Printer Alignment Test

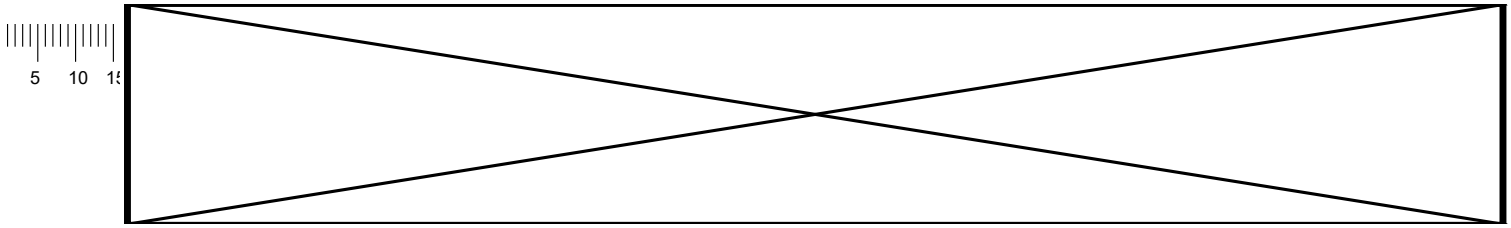

Grid & margin check (0.5in squares, centered crosshair)

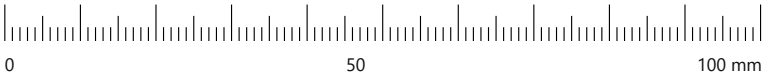

Corner registration marks

Diagonal check (corner-to-corner lines)

Scale check: the bar is exactly 100 mm and the outline is bank-card size (85.60 × 53.98 mm) at 100% scale

Margin gauges at the top and left paper edges: the first 1 mm line that printed shows that edge's unprintable margin.

Date: _____ Note: _____

Lines look wavy or doubled instead of skewed? That's usually a print head alignment issue, not a paper feed problem — try the nozzle check test page too, or grab a PDF version to save for later.
